Please note that there were no certificates given as confirmation of attendance and completion of these training sessions.

From the above it is evident that it would take significant period of time for someone to obtain training on UHOne architecture and Finance module which is being used to process all the Finance related transactions". And training would give an employee only the basic knowledge of the UHOne architecture. In addition, the critical projects in pipeline require someone with expert level knowledge on Claims module. Mr. Himanshu has been chosen specifically for his experience, training, and specialized knowledge.
